Contact: send email to [pdg-feedback-workspace@pdg.lbl.gov](mailto:pdg-feedback-workspace@pdg.lbl.gov)

- Starting point for PDG collaborators, login in

<https://pdgprod.lbl.gov/PdgWorkspace> and encoding instructions at  
[pdgprod.lbl.gov/twiki/bin/view/Pdg/PdgEncodingInstructions](https://pdgprod.lbl.gov/twiki/bin/view/Pdg/PdgEncodingInstructions)

- Each person requires a login via their email address used by PDG

- **Encoding procedures:**(Recap for new users)

- Go to pdg.lbl.gov, Click “About PDG” and “Encode Tools” or go direct to <http://pdg.lbl.gov/rpp/encoders/contents.html>
- Click “Particle Listings under Revision” to find list of particles
- For example, click “Bottom Mesons” to find list of B mesons
- Click  $B^+$  S041.pdf and on right side of pages: **listed node names and DESIG**
  - Each decay has DESIG=xx number to be ordered in list
  - Each node has unique name on right side: S041S95
  - See next page for examples.
  - Useful to identify the node name and desig code before encoding .

- Decay Modes are located via DESIG and each branching ratio has Node name
- \Gamm is dynamic generated not useful

| Mode   | Fraction ( $\Gamma_i/\Gamma$ )     | Scale factor/<br>Confidence level |
|--|------------------------------------|-----------------------------------|
| <b>Semileptonic and leptonic modes</b>       |                                    |                                   |
| $\Gamma_1 \ell^+ \nu_\ell$ anything          | [a] ( 10.99 $\pm$ 0.28 ) %         | NODE=S041;CLUMP=A<br>DESIG=220    |
| $\Gamma_2 e^+ \nu_e X_c$                     | ( 10.8 $\pm$ 0.4 ) %               | DESIG=473                         |
| $\Gamma_3 D \ell^+ \nu_\ell$ anything        | ( 9.8 $\pm$ 0.7 ) %                | DESIG=485                         |
| $\Gamma_4 \bar{D}^0 \ell^+ \nu_\ell$         | [a] ( 2.27 $\pm$ 0.11 ) %          | DESIG=145                         |
| $\Gamma_5 \bar{D}^0 \tau^+ \nu_\tau$         | ( 7.7 $\pm$ 2.5 ) $\times 10^{-3}$ | DESIG=498                         |
| $\Gamma_6 \bar{D}^*(2007)^0 \ell^+ \nu_\ell$ | [a] ( 5.69 $\pm$ 0.19 ) %          | DESIG=146                         |
| $\Gamma_7 \bar{D}^*(2007)^0 \tau^+ \nu_\tau$ | ( 1.88 $\pm$ 0.20 ) %              | DESIG=499                         |
| $\Gamma_8 D^- \pi^+ \ell^+ \nu_\ell$         | ( 4.2 $\pm$ 0.5 ) $\times 10^{-3}$ | DESIG=418                         |

Indent means sub-decay channel

### $\Gamma(\bar{D}^0 \tau^+ \nu_\tau)/\Gamma_{\text{total}}$

VALUE (units  $10^{-2}$ )

**0.77  $\pm$  0.22  $\pm$  0.12**

• • • We do not use the following data for averages, fits, limits, etc. • • •

$0.67 \pm 0.37 \pm 0.13$

# Add Measurement

- Look up the corresponding node from the full data listing (s041.pdf or s042.pdf), which is more efficient when there are couple hundred decays or Data Block Browsers below.
- Do encoding below and save. Using latex for footnote and comment is acceptable.

The measurement has been deleted.

|---------|---|-------------------|------|----------|-----|---|
| S040R3  | $\Gamma(A_b^0 \rightarrow J/\psi l^+ l^-) / \Gamma_{\text{total}}$                | AAJ <sup>-1</sup> | LHCb | at 7 TeV | 1   | <a href="#">edit</a> <a href="#">delete</a> |
| S040R1  | $\Gamma(A_b^0 \rightarrow p D^0 \pi^-) / \Gamma_{\text{total}}$                   | AAJ <sup>-1</sup> | LHCb | at 7 TeV | 1   | <a href="#">edit</a> <a href="#">delete</a> |
| S040R22 | $\Gamma(A_b^0 \rightarrow p D^0 K^-) / \Gamma(A_b^0 \rightarrow p D^0 \pi^-)$     | AAJ <sup>-1</sup> | LHCb | at 7 TeV | 1   | <a href="#">edit</a> <a href="#">delete</a> |
| S040R13 | $\Gamma(A_b^0 \rightarrow A_c^1 \pi^-) / \Gamma_{\text{total}}$                   | AAJ <sup>-1</sup> | LHCb | at 7 TeV | 1   | <a href="#">edit</a> <a href="#">delete</a> |
| S040R21 | $\Gamma(A_b^0 \rightarrow n D^0 \pi^-) / (\Gamma(A_b^0 \rightarrow A_c^1 \pi^-))$ | AAJ <sup>-1</sup> | LHCb | at 7 TeV | 1   | <a href="#">edit</a> <a href="#">delete</a> |

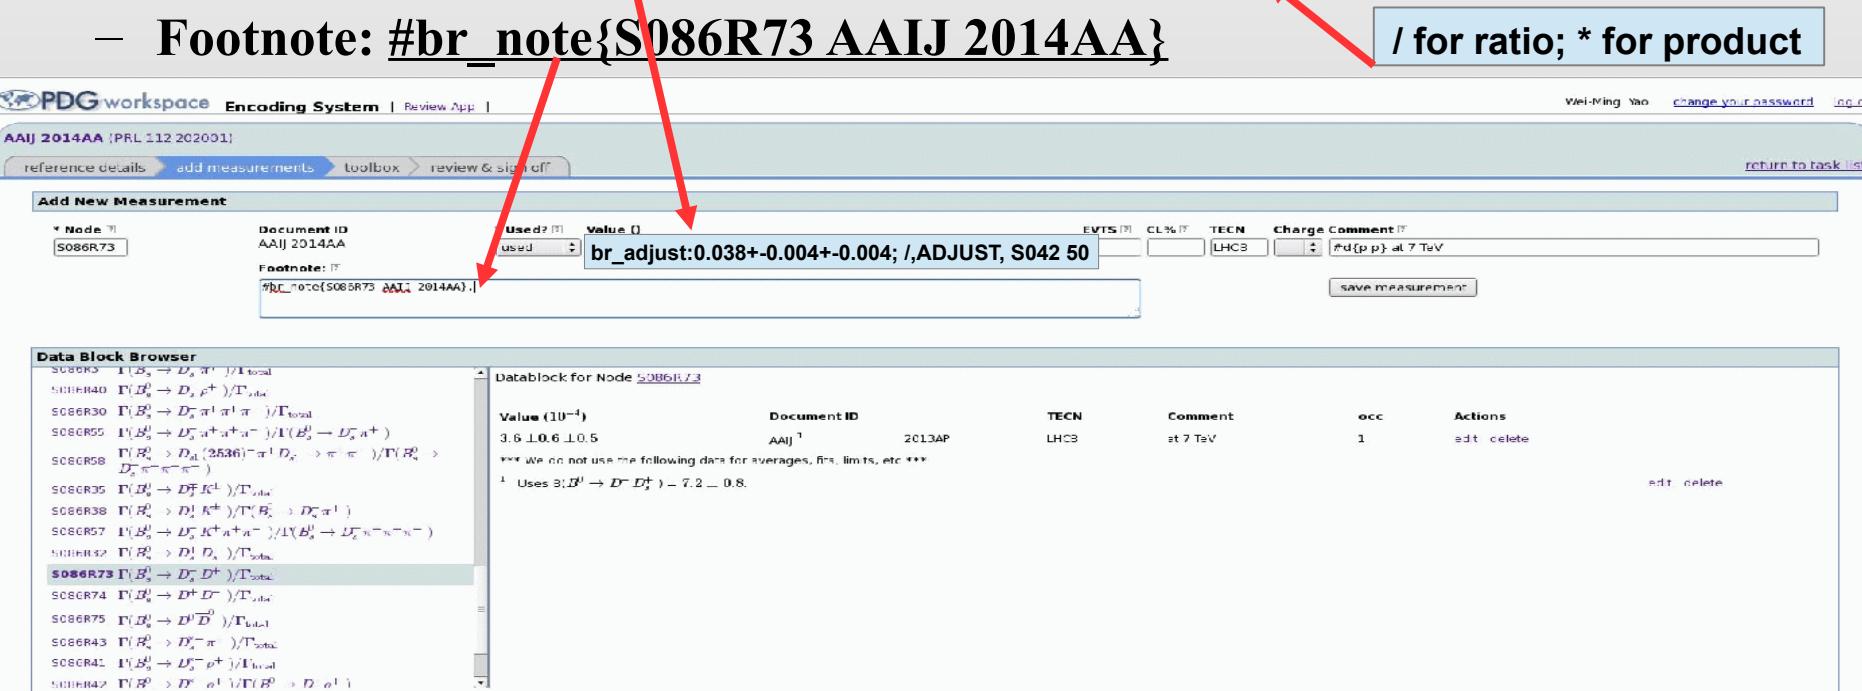

- Some case, a ratio of branching ratio is measured, for example,  $B(B_s \rightarrow D^+ D_s^-)/B(B^0 \rightarrow D^+ D_s^-) = 0.038 \pm 0.004 \pm 0.003$ .

- PDG uses br\_adjust to rescale  $B(B_s \rightarrow D^+ D_s^-)$  properly when the value of  $B(B^0 \rightarrow D^+ D_s^-)$  could change in future. The syntax are below:

- Measurement: br\_adjust:0.038+-0.004+-0.003; /,ADJUST, S042 50
- Footnote: #br\_note{S086R73 AAIJ 2014AA}

DESIG for  $B^0 \rightarrow D^+ D_s^-$

/ for ratio; \* for product

The screenshot shows the PDG workspace interface for adding a new measurement. In the 'Add New Measurement' section, the 'Value' field contains the string `br_adjust:0.038+-0.004+-0.003; /,ADJUST, S042 50`. Below this, the 'Footnote' field contains `#br_note{S086R73 AAIJ 2014AA}`. Red arrows point from the 'br\_note' string in the footnote to the 'br\_note' string in the measurement value and to the explanatory text 'for ratio; \* for product'.

The 'Data Block Browser' section shows a list of branching ratio measurements, with node `S086R73` highlighted. The table includes columns for Value ( $\times 10^{-4}$ ), Document ID, TECN, Comment, and Actions.

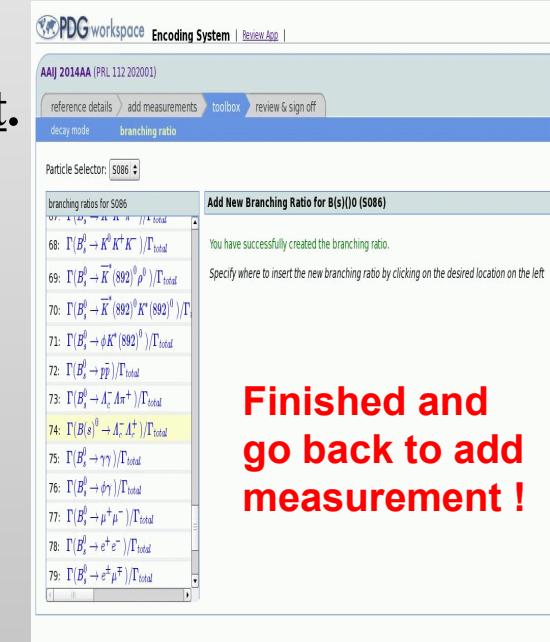

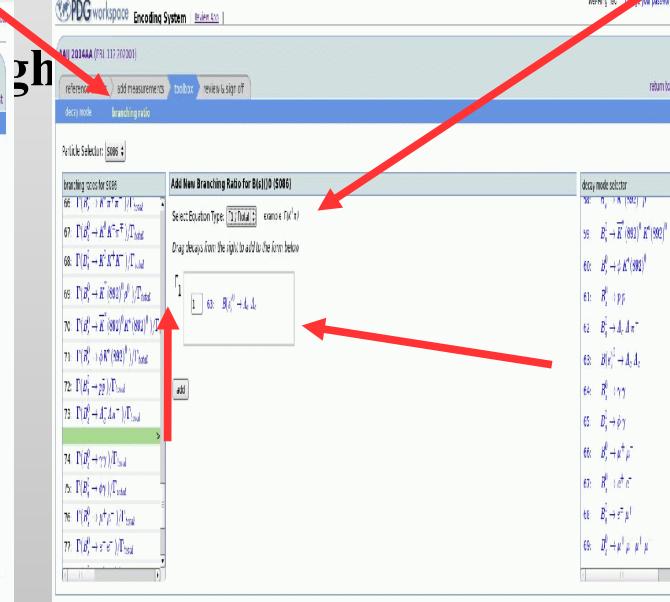

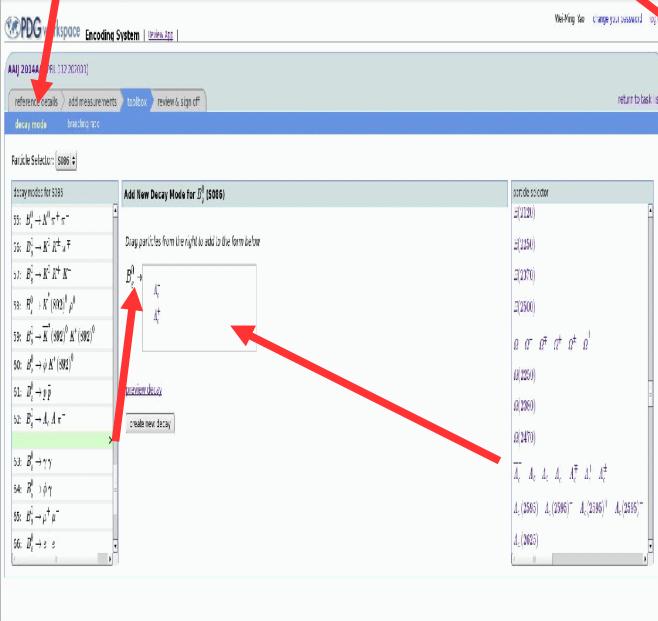

|         | Value ( $\times 10^{-4}$ ) | Document ID              | TECN | Comment  | Actions     |
|---------|----------------------------|--------------------------|------|----------|-------------|
| S086R73 | 3.6 ± 0.6 ± 0.5            | AAIJ <sup>1</sup> 2013AP | LHCb | at 7 TeV | edit delete |

- Creating new decay is not recommended for B+, and B0 (ask overseer and Piotr for it).

- Select particle, browser list decays locating where to put new decay.
  - Drag particles on the right box to form the decay chain and save it

### ~~•Creating Branch ratios:~~

- Browser Branching ratios node to locate where to put and decide ratio or BR

**Finished and  
go back to add  
measurement !**

- Click “Review to sign off” will show you all the encoding for the paper so far
- Click “review RPP” shows pdf file and edit to correcting any mistakes
- Be careful: measurement used or not, add comments “Repl. By ...”. final sign off

- Some parts of encoding are still not working friendly
- About half of encoders and overseers have used the new system for RPP2014
- We encourage every encoder to try out the new system early, do not wait for the last mintues.
- It will take you some time in the beginning, but let us know if you have any problems.
- Once familiar with the system, the encoding efficiency will improve.
